## Claim Objections

Claims 3, 5, and 6 are objected to because of the following informalities: in claim 3, it is suggested to define the parameters in the mathematical equations involving the longitudinal velocity, lateral velocity, yaw rate, roll rate, roll angle, the slip angles, and the slip ratios. Claims 5 and 6 are necessarily objected to as per their dependency upon the objection of claim 3.

Appropriate correction is required.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Faye et al. (US 6,494,281 B1) teaches a method and device using different parameters for stabilizing a vehicle.

This application is in condition for allowance (statement of reasons to follow) except for the following formal matters: as per above objection.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
